# Critical Infrastructure Sectors

Over 30,000 members nationwide represent the 16 critical infrastructure sectors outlined by the Department of Homeland Security, in approximately the percentages listed below.

# National Sector Security and Resilience Program

## InfraGard National Sector Security and Resilience Program (NSSRP)

### Why a Sector Program?

The InfraGard National Sector Security and Resilience Program (NSSRP), formerly known as the Sector Program, is intended to strengthen national critical infrastructure security and resilience.

The NSSRP was conceived as the "Sector Program" within the Kentucky Chapter in 2003. The success of the program in Kentucky led to the expansion of the program throughout InfraGard chapters nationwide.

The NSSRP contributes to overall InfraGard mission through the creation and sustainment of a "network-of-networks" to foster collaboration and information sharing among and between owners, operators, and participants of critical infrastructure within individual sectors.

An effective NSSRP will achieve the following objectives:

- Recruitment of all CI owners and operators pertinent to the local IMA;
- Provision of education and training that meets the needs of CI owners and operators;
- Enablement of intra/inter-sector networking opportunities for CI owners and operators; and
- Timely, accurate, and actionable two-way information sharing.

□ [InfraGard National Sector Security and Resiliency Program \(NSSRP\)](#)

# National Cross-Sector Council Program

- The National Cross-Sector Council (NCSCP) Program enhances timely, accurate, and effective dissemination and exchange of cross-sector specific information among InfraGard members. The goal is to protect, secure, and ensure operational resilience of the nation's interdependent critical infrastructures by providing comprehensive expertise to communities throughout the United States. A Cross-Sector Council only addresses issues that cross two or more sectors.

# National Cross-Sector Council (NCSCP) Program

## Cross-Sector Councils

### **InfraGard National Cross-Sector Council Program (NCSCP)**

The National Cross-Sector Council Program was created to enhance timely, accurate and effective dissemination and exchange of cross-sector specific information to protect, secure and ensure the operational resilience of the nation's interdependent, globally and Internet reliant critical infrastructure(s) by providing comprehensive expertise to communities throughout the US. A council addresses an issue that must cross two or more sectors.

# National Infrastructure Security and Resilience University

- National Infrastructure Security and Resilience University (NISRU) is the flagship eLearning program of InfraGard National Members Alliance. The mission of NISRU is to further the InfraGard mission by developing and delivering training and workforce development programs, including webinars, workshops, conference events, and other learning opportunities, for InfraGard members and other security stakeholders to advance their knowledge and skills in critical infrastructure protection and resilience.

# InfraGard NextGen

- ***What are the benefits of the NextGen Initiative?***
- **Giving InfraGard Leaders a Voice** - Self-assessment is important for a program that has existed for nearly three decades. This is the right time to look within InfraGard to identify strengths, weaknesses, challenges and opportunities, foster innovation, and focus on delivering measurable results.
- **Beyond Partnership: From Partners to Teammates** - We have reached the point in InfraGard's history where we must shift our mindset from that of partners to teammates to continue being force multiplier for the next 5, 10, 20 years and beyond.
- **Strengthening the InfraGard Program in Support of the Mission** – The NextGen Initiative is intended to position InfraGard to be the strongest resource possible to the FBI, our members, local, state and federal governments, and the mission.
